

What happens to my ballot when I vote at a Vote Center?

Voter casts ballot into Integrated Ballot Box attached to the Ballot Marking Device

When the Vote Center closes, Election Workers place all ballots into a Secure Ballot Transportation Box

Two Election Workers transport the ballots to a designated Check-in Center

Sheriffs transport the ballots from the Check-in Center to the Tally Operation Center

Election Workers receive the ballots from Sheriffs then sort and prepare the ballots for tally

All ballots that are cast early and on Election Day are tallied and results are tabulated

Election results are automatically updated to LAVOTE.GOV

Tally will continue throughout the night and early morning until all ballots from Election Day are counted

Provisional and Conditional ballots cast are processed and once verified counted in the Official Election Canvass (post-Election Day)

Certified election results are announced and reported within 30 days of Election Day
